ONYEKACHI UWASOMBA

BACKEND DEVELOPER | REST APIs | DATABASE INTEGRATION

Abuja, Nigeria • +234 803 460 2817 • onyeka4jc@gmail.com
LinkedIn: linkedin.com/in/onyekachi-uwasomba-641221223 | Portfolio: onyeka4jc.github.io | GitHub: github.com/onyeka4jc

PROFESSIONAL SUMMARY

Backend developer with hands-on experience building RESTful APIs and server-side features using Node.js and Express. Practical work includes CRUD workflows, MongoDB/Mongoose persistence, PostgreSQL data modelling, JWT authentication and role-based access control, request validation, and API testing with Postman. Brings previous experience in software testing, test documentation, database scripting, technical documentation, and user support. Focused on developing clear, maintainable APIs and handling data reliably.

TECHNICAL SKILLS

Backend & APIs
JavaScript, Node.js, Express.js, REST API design, CRUD operations, middleware, error handling

Databases
MongoDB, MongoDB Atlas, Mongoose, PostgreSQL, Supabase, SQL, schema design

Security & validation
JWT, OAuth, authentication, role-based access control, Joi request validation

Tools & delivery
Git, GitHub, Postman, npm, Render, dotenv and environment-variable configuration

SELECTED BACKEND PROJECTS

MongoDB-Powered Todo API | **Repository**
Node.js · Express · MongoDB Atlas · Mongoose · Joi
Built a standalone Todo REST API with persistent MongoDB storage, a Mongoose data model, CRUD endpoints, and active/completed-item filtering. Uses an environment variable for the database connection string.

Authenticated Blog API | **Repository**
Node.js · Express · MongoDB/Mongoose · JWT
Developed protected blog API functionality with authentication and authorization, including ownership-aware access to content operations.

Blog REST API | **Repository**
Node.js · Express · MongoDB/Mongoose
Built RESTful server-side workflows for blog content, using database-backed models and structured request handling.

Expense Tracker API | **Repository**
Node.js · Express · REST APIs · Postman
Collaborated on a backend development capstone, contributing to project documentation and a Postman collection to support API testing.

Product Controller Development — E-commerce Catalog | **Repository**
Collaborative GitHub contribution · Pull request
Contributed product controller functions to the BD-Adv-Group-2 e-commerce Product Catalog API through a GitHub pull request, demonstrating collaborative development and version-control workflow.

EXPERIENCE

Backend Development Intern | BeTechified | 2026 – Present
Advanced backend development training with structured mentorship and practical project work.
- Built RESTful API endpoints in Node.js and Express to support a learner registration platform.
- Designed and managed a PostgreSQL schema for user and cohort data.
- Implemented JWT-based authentication and role-based access control for an admin dashboard.
- Used Postman to test API responses and error handling, and deployed a backend application to Render with environment variables configured securely.

Software Tester | X-Soft Resources Limited | 2014–2015
ICT company specialising in software solution design and development.
- Documented test cases and test results, and tested software against requirements specifications.
- Prepared database scripts and user manuals; supported the training of software users.

System Support Personnel | Benod International Limited | 2013–2014
Supplier of TRANE industrial air-conditioning and HVAC systems.
- Provided computer-based office support and assisted with technical and product information tasks.
- Supported chiller-unit and part selection, part-number identification, pricing, and price analysis.

EDUCATION

Bachelor of Science (B.Sc.), Computer Science | Lagos State University | 2012
Second Class Honours

CERTIFICATION

BeTechified Backend Development Certificate | 2026
